## The brand of wellness

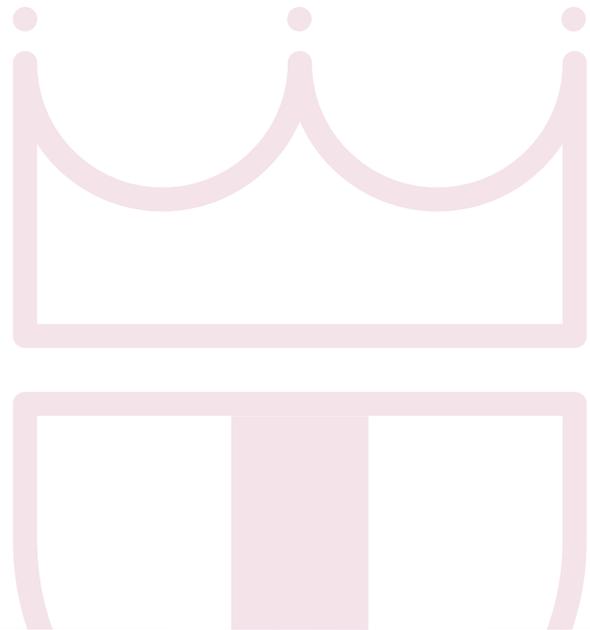

Bottega Reale – Saperi del Piemonte has won an unprecedented challenge: it has joined twenty producers, united by the common aim of working across the food and wellness sectors to affirm the quality of Piedmontese officinal herbs through an authentic product. This effort has been enhanced thanks to the collaboration with the Haute Provence producers, partners in the cross-border cooperation program ALCOTRA “Officina Aromataria”.

## The identity footprint

Bottega Reale – Saperi del Piemonte is a unique brand, which concretely redefines the value of quality. Each product is made by identity raw material. Nothings has been left to chance: experts from the degree in Herbal Studies of the University of Torino have selected around thirty raw materials and products that contain the territorial specificities. These small treasures have become the thread running through Bottega Reale products, such as mint, wormwood, camomile, everlasting from Pancalieri, Alta Langa hazelnuts, Roero’s moscato wine, wild honey and lavender from the Maritime Alps.

### **Sustainable innovation**

The product is nurtured in every step of the process, balancing tradition with innovation. Among the choices of partners, it has been very important to prefer the ones using clean energy and renewable sources. The aim is a fair balance between nature and technology, between genuine material and cutting-edge products.

### **Meet the producers**

What is so exceptional in the brand Bottega Reale– Saperi del Piemonte can be read on the producers' faces. It is actually possible to meet the men and women who are behind the label, to understand their choices and the transformation paths they have chosen to enhance the peculiarity of the land and its traditions. This is the real value of a guaranteed production chain, which translates the will of protecting the consumers from uncontrolled importation to a concrete action.

# ✿ Tastes and aromas for the table

*The food products of Bottega Reale – Saperi del Piemonte are the perfect sum of farming and handcraft knowledge.*

## Arquebuse

Tansy is a wild herb with digestive properties and it is known as "arquebuse" in the Piedmontese dialect. It has been used to make liquors since the past. The Bottega Reale Arquebuse is made using ultrasound distillation technology which allows to keep all the properties of the herbs in the final extracts.

Wild herbs from Lemma Valley.

**Ingredients:**  
spring water, fructose, ethyl alcohol, Tanacetum vulgare extract L. 10%.
